

39.407 Medical, psychiatric, and psychological examination and treatment of child; physical, mental, or substance abuse examination of person with or requesting child custody.--

(3)(a)1. Except as otherwise provided in subparagraph (b)1. or paragraph (e), before the department provides psychotropic medications to a child in its custody, the prescribing physician shall attempt to obtain express and informed consent, as defined in s. [394.455\(9\)](#) and as described in s. [394.459\(3\)\(a\)](#), from the child's parent or legal guardian. The department must take steps necessary to facilitate the inclusion of the parent in the child's consultation with the physician. However, if the parental rights of the parent have been terminated, the parent's location or identity is unknown or cannot reasonably be ascertained, or the parent declines to give express and informed consent, the department may, after consultation with the prescribing physician, seek court authorization to provide the psychotropic medications to the child. Unless parental rights have been terminated and if it is possible to do so, the department shall continue to involve the parent in the decisionmaking process regarding the provision of psychotropic medications. If, at any time, a parent whose parental rights have not been terminated provides express and informed consent to the provision of a psychotropic medication, the requirements of this section that the department seek court authorization do not apply to that medication until such time as the parent no longer consents.

2. Any time the department seeks a medical evaluation to determine the need to initiate or continue a psychotropic medication for a child, the department must provide to the evaluating physician all pertinent medical information known to the department concerning that child.

(b)1. If a child who is removed from the home under s. [39.401](#) is receiving prescribed psychotropic medication at the time of removal and parental authorization to continue providing the medication cannot be obtained, the department may take possession of the remaining medication and may continue to provide the medication as prescribed until the shelter hearing, if it is determined that the medication is a current prescription for that child and the medication is in its original container.

2. If the department continues to provide the psychotropic medication to a child when parental authorization cannot be obtained, the department shall notify the parent or legal guardian as soon as possible that the medication is being provided to the child as provided in subparagraph 1. The child's official departmental record must include the reason parental authorization was not initially obtained and an explanation of why the medication is necessary for the child's well-being.

3. If the department is advised by a physician licensed under chapter 458 or chapter 459 that the child should continue the psychotropic medication and parental authorization has not been obtained, the department shall request court authorization at the shelter hearing to continue to provide the psychotropic medication and shall provide to the court any information in its possession in support of the request. Any authorization granted at the shelter hearing may extend only until the arraignment hearing on the petition for adjudication of dependency or 28 days following the date of removal, whichever occurs sooner.

4. Before filing the dependency petition, the department shall ensure that the child is evaluated by a physician licensed under chapter 458 or chapter 459 to determine whether it is appropriate to continue the psychotropic medication. If, as a result of the evaluation, the department seeks court authorization to continue the psychotropic medication, a motion for such continued authorization shall be filed at the same time as the dependency petition, within 21 days after the shelter hearing.

(c) Except as provided in paragraphs (b) and (e), the department must file a motion seeking the court's authorization to initially provide or continue to provide psychotropic medication to a child in its legal custody. The motion must be supported by a written report prepared by the department which describes the efforts made to enable the prescribing physician to obtain express and informed consent for providing the medication to the child and other treatments considered or recommended for the child. In addition, the motion must be supported by the prescribing physician's signed medical report providing:

1. The name of the child, the name and range of the dosage of the psychotropic medication, and that there is a need to prescribe psychotropic medication to the child based upon a diagnosed condition for which such medication is being prescribed.
2. A statement indicating that the physician has reviewed all medical information concerning the child which has been provided.
3. A statement indicating that the psychotropic medication, at its prescribed dosage, is appropriate for treating the child's diagnosed medical condition, as well as the behaviors and symptoms the medication, at its prescribed dosage, is expected to address.
4. An explanation of the nature and purpose of the treatment; the recognized side effects, risks, and contraindications of the medication; drug-interaction precautions; the possible effects of stopping the medication; and how the treatment will be monitored, followed by a statement indicating that this explanation was provided to the child if age appropriate and to the child's caregiver.
5. Documentation addressing whether the psychotropic medication will replace or supplement any other currently prescribed medications or treatments; the length of time the child is expected to be taking the medication; and any additional medical, mental health, behavioral, counseling, or other services that the prescribing physician recommends.

(d)1. The department must notify all parties of the proposed action taken under paragraph (c) in writing or by whatever other method best ensures that all parties receive notification of the proposed action within 48 hours after the motion is filed. If any party objects to the department's motion, that party shall file the objection within 2 working days after being notified of the department's motion. If any party files an objection to the authorization of the proposed psychotropic medication, the court shall hold a hearing as soon as possible before authorizing the department to initially provide or to continue providing psychotropic medication to a child in the legal custody of the department. At such hearing and notwithstanding s. [90.803](#), the medical report described in paragraph (c) is admissible in evidence. The prescribing physician need not attend the hearing or testify unless the court specifically orders such attendance or testimony, or a party subpoenas the physician to attend the hearing or provide testimony. If, after considering any testimony received, the court finds that the department's motion and the physician's medical report meet the requirements of this subsection and that it is in the child's best interests, the court may order that the department provide or continue to provide the psychotropic medication to the child without additional testimony or evidence. At any hearing held under this paragraph, the court shall further inquire of the department as to whether additional medical, mental health, behavioral, counseling, or other services are being provided to the child by the department which the prescribing physician considers to be necessary or beneficial in treating the child's medical condition and which the physician recommends or expects to provide to the child in concert with the medication. The court may order additional medical consultation, including consultation with the MedConsult line at the University of Florida, if available, or require the department to obtain a second opinion within a reasonable timeframe as established by the court, not to exceed 21 calendar days, after such order based upon consideration of the best interests of the

child. The department must make a referral for an appointment for a second opinion with a physician within 1 working day. The court may not order the discontinuation of prescribed psychotropic medication if such order is contrary to the decision of the prescribing physician unless the court first obtains an opinion from a licensed psychiatrist, if available, or, if not available, a physician licensed under chapter 458 or chapter 459, stating that more likely than not, discontinuing the medication would not cause significant harm to the child. If, however, the prescribing psychiatrist specializes in mental health care for children and adolescents, the court may not order the discontinuation of prescribed psychotropic medication unless the required opinion is also from a psychiatrist who specializes in mental health care for children and adolescents. The court may also order the discontinuation of prescribed psychotropic medication if a child's treating physician, licensed under chapter 458 or chapter 459, states that continuing the prescribed psychotropic medication would cause significant harm to the child due to a diagnosed nonpsychiatric medical condition.

2. The burden of proof at any hearing held under this paragraph shall be by a preponderance of the evidence.

(e)1. If the child's prescribing physician certifies in the signed medical report required in paragraph (c) that delay in providing a prescribed psychotropic medication would more likely than not cause significant harm to the child, the medication may be provided in advance of the issuance of a court order. In such event, the medical report must provide the specific reasons why the child may experience significant harm and the nature and the extent of the potential harm. The department must submit a motion seeking continuation of the medication and the physician's medical report to the court, the child's guardian ad litem, and all other parties within 3 working days after the department commences providing the medication to the child. The department shall seek the order at the next regularly scheduled court hearing required under this chapter, or within 30 days after the date of the prescription, whichever occurs sooner. If any party objects to the department's motion, the court shall hold a hearing within 7 days.

2. Psychotropic medications may be administered in advance of a court order in hospitals, crisis stabilization units, and in statewide inpatient psychiatric programs. Within 3 working days after the medication is begun, the department must seek court authorization as described in paragraph (c).

(f)1. The department shall fully inform the court of the child's medical and behavioral status as part of the social services report prepared for each judicial review hearing held for a child for whom psychotropic medication has been prescribed or provided under this subsection. As a part of the information provided to the court, the department shall furnish copies of all pertinent medical records concerning the child which have been generated since the previous hearing. On its own motion or on good cause shown by any party, including any guardian ad litem, attorney, or attorney ad litem who has been appointed to represent the child or the child's interests, the court may review the status more frequently than required in this subsection.

2. The court may, in the best interests of the child, order the department to obtain a medical opinion addressing whether the continued use of the medication under the circumstances is safe and medically appropriate.

(g) The department shall adopt rules to ensure that children receive timely access to clinically appropriate psychotropic medications. These rules must include, but need not be limited to, the process for determining which adjunctive services are needed, the uniform process for facilitating the prescribing physician's ability to obtain the express and informed consent of a child's parent or guardian, the procedures for obtaining court authorization for the provision of

a psychotropic medication, the frequency of medical monitoring and reporting on the status of the child to the court, how the child's parents will be involved in the treatment-planning process if their parental rights have not been terminated, and how caretakers are to be provided information contained in the physician's signed medical report. The rules must also include uniform forms to be used in requesting court authorization for the use of a psychotropic medication and provide for the integration of each child's treatment plan and case plan. The department must begin the formal rulemaking process within 90 days after the effective date of this act.
